DETAILED ACTION

Specification

1.

• On page 1, before "BACKGROUND OF THE INVENTION", insert:

"CROSS REFERENCE TO RELATED DOCUMENT

This application claims priority to Taiwanese Patent Applications No. 092125671, filed on Septembber 17, 2003.".

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. They fail to have any of the Statutory Categories of: a "machine", "manufacture" and "composition of matter", which all define things or products, and a "process", which defines actions. They are rather a computer language such as AUTOCAD, Pro Router or some forms of programming EDA software. The claims are mere transformation of data in the CAD system without transforming an article or physical object to a different state

or thing.

Claims 1-16 are also rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific asserted utility or a well established utility.

The applicants' claimed invention of routing signal traces on two layers and positioning a plurality of vias between the two layers for interconnection, which are the basic multilayer circuit board to be either auto- or manual-routed by PCB layout/design software and the undefined routing of the traces through the Kth, Mth, Rth traces, etc... on each layer, is not supported by a specific asserted utility for the reasons set forth above, credibility cannot be assessed.

Claims 1-16 are further rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.
